CAREER OBJECTIVE:

Enthusiastic and motivated Mechanical graduate with a strong passion for full stack development using Python. Eager to contribute my skills in web development, problem-solving, and teamwork to create innovative and efficient solutions.

EDUCATION:

Bachelor of Technology in Mechanical Engineer

Coastal Institute of Technology and Management, Kothavalasa,535183

Jan 2023

Percentage: 60%

SKILLS:

- **Full Stack Development:** Proficient in developing end-to-end web applications using Python, and Django.
- **Front-end Technologies:** HTML, CSS, Bootstrap and JavaScript building user-friendly and responsive interfaces.
- **Back-end Technologies:** Python, Django for creating robust and scalable server-side logic.
- **Database Management:** Experience with SQL and MySQL databases.
- **Problem Solving:** Strong analytical and problem-solving skills honed through coding challenges and projects.
- **Software Development Lifecycle:** Familiarity with agile methodologies and software development best practices.

PROJECTS:

E-commerce Website with CRUD Operations:

Developed a feature-rich e-commerce website using Django and Bootstrap. Implemented CRUD (Create, Read, Update, Delete) operations for managing products, ensuring a seamless user experience. Enabled users to browse products, add items to the cart, and proceed to checkout.

Car Parking Management App with CRUD Operations:

Created a comprehensive task management application using Django. Integrated CRUD operations for tasks, allowing users to effortlessly create, edit, prioritize, and delete tasks. Designed an interactive user interface for efficient task management.

Travel Guide App with Admin Panel and User Panel:

Conceptualized and developed a comprehensive travel guide application using HTML, CSS, and JavaScript. Implemented a robust admin panel using Django, allowing administrators to manage travel destinations, itineraries, and experiences seamlessly. Designed and integrated a user panel, empowering travel enthusiasts to explore, add, edit, and delete their travel entries conveniently. The admin panel provides administrators with privileged access to perform CRUD operations, ensuring efficient content management. Users can dynamically interact with the travel guide through the user panel, creating a personalized experience for documenting and sharing their journeys. Ensured a responsive and visually appealing design for both panels, enhancing the overall user experience in the exploration and management of travel experiences.

EDUCATIONAL BACKGROUND:

Relevant Courses:

- Web Development with Django
- Full Stack Development with Python
- Database Design and Management
- Software Engineering Principles

ACHIEVEMENTS:

- Attended one month training for MS OFFICE organized by IIET
- Attended two-day workshop for Fundamentals of python by 1 step grow.
- Completed course Web Development with Django at iHub Talent Info Systems
- Completed course Full Stack Development with React and Python at iHub Talent Info Systems
- Completed course Database Design and Management at iHub Talent Info Systems.
- Completed one project as an intern in Ramana soft.

LANGUAGES:

- English (Fluent)
- Telugu (Fluent)

DECLARATION

I hereby declare that the above particulars are facts and information stated are true, correct and complete to the best of my belief and knowledge.
